

Are you battling with Type 2 Diabetes?

Doctors and researchers are currently conducting a clinical trial designed to better understand diabetes treatment. This cross-over study evaluates the differences between two combinations for FDA approved diabetes treatments on blood glucose control.

You may be eligible to participate in a Nationwide Research Study if you:

- Are 21-70 years of age
- Are currently on insulin alone or in combination with oral agents
- Are willing to check your blood glucose 4 times per day

You will receive health tests, study drug and all glucose monitoring supplies at no charge to you. You will also be compensated for your time and travel.

If you are interested in learning more about this study, call the Research Institute of Dallas and contact Terry at 214-265-2148. Exploring information regarding this potential research study does not obligate you to participate in the study.
