

Is Diabetes a Part of Your Life?

Learning to live with this chronic disease isn't easy. Even with proper diet, plenty of exercise and regular medication, keeping your blood sugar under control can still be challenging. If you have type 2 diabetes, you may be eligible for a research study of an investigational oral, once daily medication, in combination with insulin.

You may qualify for this study if you:

- Are between 18 and 70 years of age
- Take oral medication to control your diabetes

If you qualify, you will receive study-related care and medication at no charge, and you may be compensated for time and travel.
